

Piano tabs - Keyboard tablature

The piano tab notation we will use is an established music notation system used on the internet. Here are the rules:

1. The white keys we will use are notated with lowercase letters. That is, c d e f g a and b.
2. The octave is indicated with a number written at the beginning of a line. The fourth octave is the middle octave on a piano keyboard.
3. A black key it is indicated with an uppercase letter. The note C means the black key immediately to the right of c. In traditional sheet music notation this note is notated c#.
4. If you are to play two notes at the same time it is indicated by placing the notes at the same horizontal position, that is, above each other.
5. Which hand to use in order to play the lines are indicated with R.H. (right hand) and L.H. (left hand) to the left of a line.
